EXPERIENCE

Ayasya Digital Solutions **Delhi, India**
Associate Technology L1 *Apr 2026 - Present*

- Developed and integrated GraphQL APIs using Strapi with a Next.js frontend, enabling efficient data fetching and dynamic content rendering for client applications
- Managed release cycles using GitHub, working across testing and production environments to ensure stable feature deployments, while building and maintaining dynamic blog systems for Aditya Birla's website

Setindiabiz **Noida, India**
Software Developer *Aug 2023 - Mar 2026*

- Engineered a Headless CMS and Micro-Frontend architecture, reducing build times by 77% and bundle size by 23%, significantly improving development scalability.
- Optimized Core Web Vitals using tree-shaking, code-splitting, and DOM optimization, achieving a 100 performance score on Google PageSpeed Insights.
- Developed an online order calculator and Company search using Zod validation and Firebase, simplifying the incorporation workflow and increasing conversions by 15%.
- Implemented unit and integration testing with Jest for complex modules such as dynamic forms and pricing calculators, reducing production bugs by 30%.
- Designing and integrating RESTful APIs in Node.js/Express to support dashboard functionality, focusing on secure authentication, efficient data retrieval, and scalable backend architecture.
- Implementing server-side rendering, API caching, and optimized state management to deliver fast dashboard performance and seamless user experience.

Hari Web Infotech **Delhi, India**
Angular Developer Intern *Feb 2023 – Aug 2023*

- Developed a suite of high-performance CRUD APIs for the Key-Insight microservice, facilitating seamless data flow between internal analytical systems and the core e-commerce engine.
- Refined frontend architecture by implementing a modular UI system using Angular, Tailwind CSS, and Shadcn UI, resulting in a significant reduction in technical debt and improved cross-browser performance.
- Empowered the design team by conducting workshops on modern frontend frameworks, streamlining the hand-off process from Figma to code and accelerating overall sprint velocity.
- Architected search optimizations for a flight booking engine by refining complex API queries and implementing throttling and debouncing strategies to minimize redundant server requests and improve UI responsiveness.

Akounto **Gurugram, India**
Software Developer Intern *Sep 2022 - Jan 2023*

- Architected high-fidelity UI modules for core accounting workflows—including invoices, estimates, and billing systems—prioritizing a friction-less user journey for financial management.
- Engineered sophisticated features such as client-side image processing, robust offline-sync capabilities, and dynamic document previews by leveraging advanced parent-child component architecture.
- Spearheaded the synchronization of web-based features into the Ionic mobile ecosystem, achieving 100% UI/UX parity across web and mobile platforms.
- Collaborated within a distributed Agile environment to maintain a unified codebase, ensuring that complex financial features were deployed simultaneously across all user touchpoints.

PROJECTS

Real-Time Chat Application — Nextjs, Node.js, RabbitMQ, MongoDB **June 2023**

- Developed a high-performance, real-time communication platform using Next.js and Node.js, utilizing an event-driven architecture to achieve sub-100 ms message latency across concurrent user sessions.
- Orchestrated a robust messaging backbone with RabbitMQ, implementing sophisticated queuing strategies and parallel processing to maintain data integrity and 99.9% delivery reliability during high traffic spikes.
- Developed an immersive real-time interface featuring live presence tracking and predictive typing indicators, leveraging WebSocket protocols to synchronize state across distributed clients.
- Optimized data ingestion and rendering by implementing a custom infinite scroll mechanism, significantly reducing initial payload sizes and server overhead through lazy-loading and efficient chat history indexing.

TECHNICAL SKILLS

Languages : Java, JavaScript, TypeScript, HTML5, CSS3, Sass
Frontend & UI : Next.js, React.js, Tailwind CSS, Redux, Zustand, shadcn/ui, ZOD, Jest, React query
Backend & Database : REST APIs, Node.js, Express js, MongoDB, GraphQL
Cloud & Services : AWS, Vercel, Git, Firebase
Tools & Platforms : Vs Code, IntelliJ IDEA, Sublime

EDUCATION

Dronacharya College of Engineering, Gurgaon **Gurgaon, India**
Bachelor of Technology - Computer Science and Engineering *Jul 2019 - Jun 2023*
